This impressive sized tracked dumper offers the highest speed combined with the highest payload in its class and will set new standards for productivity and mobility. With its 13,200 kg capacity, this rubber tracked crawler carrier has the largest payload of any vehicle of this type in its category.

The rotating separation of this vehicle allows the operator to work in tight, sensitive areas where other vehicles do not have access. Together with a ground pressure of 7.46 psi and a strong pull ratio, these features allow this carrier crawler to be suitable for all major muck shifting, pipeline and most variations of projects, especially if the terrain is difficult, without damage to the environment.

TOTAL HEIGHT: 3214mm
